

# OCTOCITY

## Smart Building

We design, develop and market a flow analysis platform based on 100% Artificial Intelligence technologies.

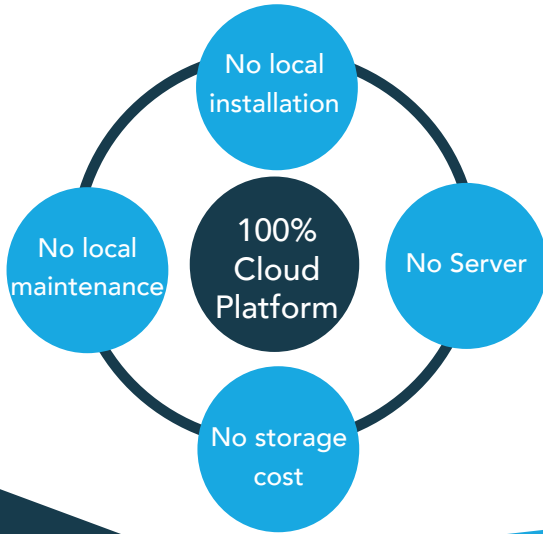

### Labels

# The Octocity Smart Building® solution

Our OctoCity® solution is suitable for all companies that are in charge of flows (passengers, vehicles, energy, pedestrians, etc.) and wish to optimize their processes. OctoCity Smart Building® allows to optimize evacuation routes, reduce waiting time, optimize resource deployment.

Guaranteed to have the latest version at all times without concern for updates

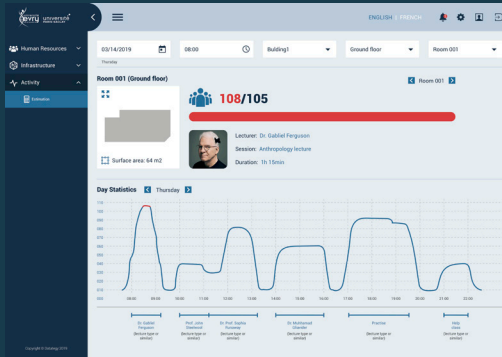

Consistent data available at any moment

Solutions connected in real time or delayed to servers

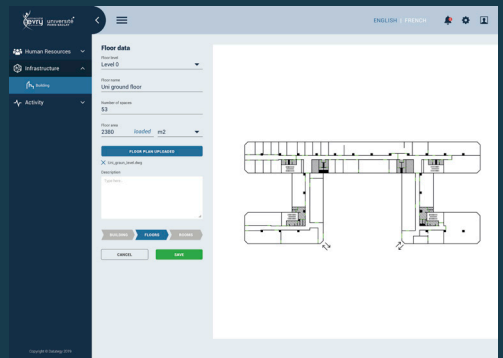

At Datategy, we imagine a future where the smart city meets your needs and expectations, where everyday life is simpler, more fluid, fairer, more ethical and more sustainable.

## Our Interfaces :

### Activity report (occupancy and estimation)

### Configuration of blueprints (validation and polygon typology)

## Features :

### Functionalities of a blueprint locker :

- Storage and visualization of plans
- Automatic quality check of plans

### Features of occupancy management :

- Compatible with CAD/CAM software versions
- Facilities management
- Real time and statistical occupancy management

### Security and counting :

- Counting people and optimizing evacuation routes
- Hazard map (zones preview, vulnerable population and projects)

## Why choosing us ?

- Realtime and accurate knowledge of situations.
- A team of world class expert in AI field.
- A wise usage of data for a better quality of public services

## Who can benefit from this solution ?

School and University

Public buildings

Shopping centers

Train station and Airport

Cities
